

Name expression, value is <maximum of two numbers function>

Name expression, value is <absolute value function>

`max(abs(ravioli_length_in - average_cat_length), abs(genghis_length_in - average_cat_length))`

Name expression,
value 21.7

Name expression,
value 18.2

Name expression,
value 16.7

`max(abs(ravioli_length_in - average_cat_length), abs(genghis_length_in - average_cat_length))`

Arithmetic expression,
value 3.5

Arithmetic expression,
value -1.3

`max(abs(3.5), abs(-1.3))`

Function call expression,
value 3.5

Function call expression,
value 1.3

`max(3.5, 1.3)`

Function call expression,
value 3.5

3.5
